

What YOU can do to help keep OES Open

BE FULLY VACCINATED

If you are eligible to receive a booster, get one. Appointments are available at OES!

UP YOUR MASK GAME

We strongly recommend that students and adults double mask or wear N95s/KN95s/KF94s. Surgical masks are available in each division for double masking.

STAY HOME

Keep your child home if they are feeling sick. Even though it is often inconvenient, this is one of the most important Covid-prevention tactics parents can do to help everyone.

THINK TWICE ABOUT LARGE SOCIAL SITUATIONS

Sleep-overs, dinner parties, and other large gatherings carry the risk of becoming spreading events. Think twice before hosting or attending.

NEED A TEST? WE CAN HELP

We provide tests at school for students who are returning from isolation or quarantine. Your child must have resolving symptoms and be fever-free (without medication) for 24 hours. Contact your division administrative assistant for help.
